

INTEGRATED STRUCTURAL SCREEN PANEL FOR PROJECTION
TELEVISION

ABSTRACT OF THE DISCLOSURE

[0031] A screen assembly for a television includes a front screen panel, an opaque masking layer applied to a perimeter of the front screen panel to define a masked perimeter area framing a viewable area of said screen assembly, and at least one touch control operatively coupled to the front screen panel in the masked perimeter area. Indicia identifies the location and/or function of the touch screen control.
